

## Information

## The time has finally come: reintroduction of the Modula series with Bluetooth connectivity

Over the past 24 months, we have been very active in the global electrical market and persisted in sourcing components for our Bluetooth connectivity despite massive material shortages. Our great commitment has paid off. It is with great pleasure that we can announce that we will be able to deliver our Modula pumps with full functionality (Bluetooth > Biral ONE App) again as of 1<sup>st</sup> of June 2023 and that digital communication with the pump will be guaranteed.

What does that exactly mean:

- > **Review:** A Bluetooth component is built into the Modula series, which was no longer available as of 1<sup>st</sup> of February 2022. From this date, we temporarily introduced a Modula range in which this Bluetooth component was no longer installed (the Modula NBT) in order to remain able to deliver.
- > **Outlook:** As of 1<sup>st</sup> of June 2023, the Modula series with Bluetooth will be available again.
- > **Price list:** Please find attached the special price list for the Modula with Bluetooth from 1<sup>st</sup> of June 2023 with the price increase of 1.5% that was reduced when we introduced the temporary Modula NBT.

If you would like to find out more, please do not hesitate to contact us. Thank you for your confidence.

With kind regards,

Vasilis Siozos  
Head of Export, Biral AG
